### Calculations for Measures

MEASURE	DESCRIPTION AND HOW IT WAS CALCULATED
<b>Retention</b>	Reports the percentage of first-time full-time undergraduate students or first-time graduate students that entered the School of Business in Fall 2022 and were retained in Fall 2023. Calculated as the number of students retained divided by the number of students entered.
<b>Graduation</b>	Reports the percentage of students completing their degrees within 150% of the standard completion time. For undergraduate degrees, this six-year graduate rate is calculated by the number of students who graduated in 2023 divided by the number of students entering in Fall 2017. For graduate degrees, this three-year graduation rate is calculated by the number of students who graduated in 2023 divided by the number of students entering in 2020.
