Molloy College B.S. Environmental Sciences Program

As an Earth and Environmental Studies major at Molloy College you will have the opportunity to excel both inside and outside of the classroom in preparation to enter highly marketable fields of employment and exciting careers in natural and environmental science. Students can choose a concentration in either Earth Science or Environmental Studies.

Built upon a foundation of natural and physical science, our introductory courses will give you the background that you need to analyze, question and contemplate solutions to the multitude of concerns affecting our coastal and global environments. Travel the world with Molloy's International Travel programs or intern at CERCOM the only horseshoe crab breeding laboratory in the United States.

ST. JOHN'S
UNIVERSITY

St. John's University M.A. Environmental Sustainability and Decision Making

Sustainability is a rapidly growing field in both the public and private sectors. The M.A. in Environmental Sustainability and Decision Making at St. John's University prepares you for a career in this dynamic area of global concern through a curriculum spanning the sciences, social sciences, and humanities. In this professional master's degree program you acquire the skills needed to develop creative solutions to today's complex environmental sustainability problems.

As a graduate of the M.A. in Environmental Sustainability and Decision Making program, you are a leader in addressing social injustice and its impact around the world. The M.A. in Environmental Sustainability and Decision Making at St. John's offers two concentrations.

Both concentrations— science and policy—combine training in core environmental science topics. Environmental scientists and specialists use their knowledge of the natural and social sciences to protect human and environmental health. Some act as researchers analyzing environmental problems and developing solutions. Others work at the policy level in governmental and nongovernmental organizations. Still others work in the private sector for consulting firms that help companies comply with regulations and policies.
