

10:15 a.m– 11:45 a.m.

Concurrent Session 1A

Best Practice for Management of Symptoms at the End of Life

In-person

Speaker:

Katlynn Van Ogtrop, MD, Northwell Health

Objectives:

- Identify what an “actively dying patient” looks like (identify the stages)
- Discuss signs and symptoms typically associated with the actively dying patient
- Discuss common family concerns associated with imminent death
- Symptom management techniques
- Practice questions and Case Presentation- focus on appropriate opiate titration in a “comfort care” setting
