What is ARES?

ARES is the library’s new electronic reserves system. It is more robust than the old system, increasing the functionality while making the program easier to use.

What are some of the new benefits to using ARES?

- Unlike the old system, everyone who would like to access the reserves needs to create an account. By having the students create accounts; instructors can check the usage of a particular item and see at the student level who is using particular materials.
- Professors now have the option of uploading materials directly to the system, which should greatly decrease the processing time.
- Allows proxy users (such as a teaching assistant) to manage class accounts.
- Provides space for chats and message boards.

How do I get started?

First go to the library homepage at: www.molloy.edu/library
All users need to create an account unless you have an account on the old system, in which case your information, settings and files will be transferred over for you. You should receive your new log in information via the email you provided the library shortly.

If you need to create a new account, click here

After log in, you will be directed to the Main screen:

Manage courses, including creating a new course

Personal settings

To create a new reserve item, choose a class from the list
Instructor’s guide

INTRODUCTION TO ARES

Course details page:

Manage individual classes and reserve items

Add a reserve item:

Add a new item to ARES (choose the appropriate format). We suggest uploading a copy of your syllabus as well.

Reuse an item from another class (students will only see items listed for a specific class)

Items currently in reserves for this class
