

Happy 66th Founders Day !!!

My name is Sister Ann Melber. I graduated from Molloy in 1971 with a B.S. in Chemistry and taught High School Chemistry for 5 years during which time I studied for my M.S. in Chemistry.

I worked at Nassau County Medical Center for 30 years, first as a Research Chemist and then as a Clinical Chemist.

When I retired from the Hospital I returned to Molloy as an adjunct in Chemistry teaching Organic and Biological Chemistry for 18 years !!

As you can see ,Chemistry was a BIG part of my life !!! I am so very grateful to Molloy for getting me started in Chemistry and I was thrilled to come back and teach Chemistry where it all began for me !!!

I'm praying for God's continuing Blessings for Molloy for at least the next 166 years !!!
