Fall 2013

Dear Resident,

Molloy College is committed to providing a safe environment for the entire community and to that end we would like you to know what fire safety devices are located in our residence halls. This advisement complies with the “Kerry Rose Fire Sprinkler Notification Act” (A.5715-a/s. 4180-B). These are the fire safety systems you will find in Fitzgerald Hall; fire sprinkler system, fire extinguishers, smoke detectors, CO2 detectors, heat detectors, fire alarm pull boxes, emergency lights, emergency phones, public address system, and emergency exits. The fire extinguishers are checked on a monthly basis to insure that they are in working condition. There will be at least one fire drill per semester. It is important that you know the location of these fire safety devices and immediately report any device that is in need of repair or has been tampered with. Remember fire safety is everyone’s business and together we can lessen the threat of fire.

If you have any questions regarding fire safety you can speak with either a Resident Assistant, Resident Life Coordinator, Fire Safety Officer or Public Safety.

Harry Herman
Director of Public Safety
