### Calculations for Measures

MEASURE	DESCRIPTION AND HOW IT WAS CALCULATED
Retention	Reports the percentage of first-time, full-time undergraduate students or first-time graduate students who entered the School of Business in Fall 2024 and were retained in Fall 2025. Calculated as the number of students retained divided by the number of students entered.
Graduation	Reports the percentage of students completing their degrees within 150% of the standard completion time. For undergraduate degrees, this six-year graduate rate is calculated by the number of students who graduated in 2025 divided by the number of students entering in Fall 2019. For graduate degrees, this three-year graduation rate is calculated by the number of students who graduated in 2025 divided by the number of students entering in 2022.
