DIRECTOR’S WELCOME

The faculty of Molloy College Division of Nursing congratulate you on your acceptance into the PhD in Nursing program. We welcome you to become a part of our community of scholars and engage with us in seminars, forums, and online scholarly activities.

We know that your decision to begin doctoral studies is a very important milestone for you. We want to help in any way possible to make your doctoral studies meaningful - - and even enjoyable!

This *Handbook* contains important information to guide you as you progress through the doctoral program, so please let me know if you have difficulty accessing the information. In addition to the *Handbook*, you should be familiar with the *Molloy College Catalog*. Both of these documents provide important details of policies and procedures for the PhD Program in Nursing.

You now have a Molloy College email account and ability to link you to the “Online Student and Faculty Access” through the website known as the, “Lion’s Den,” where all information on activities, schedules, and other timely issues will be posted. It is imperative that you check this account frequently. This is also the email account that your faculty and advisor will use to contact you. If you change your home address or telephone contacts, inform me immediately. The outcomes of several program milestones are sent via mail.

**You must use your Molloy “Lions” email address for communication. We will only send out information to that address, so it is important to check it often.**

I will be coordinating your assignments for advisors, research residency placements, candidacy/comprehensive examination and dissertation committee. My door is open. I would like to help in any way possible to facilitate your progress through the doctoral program. I look forward to working with you throughout your studies!

Sincerely,

Veronica D. Feeg, PhD, RN, FAAN
Associate Dean and Director of the PhD Program
Assistant Dean and Director of the Center for Nursing Research and Scholarly Practice
Division of Nursing
Molloy College
Molloy College

MISSION STATEMENT AND GOALS

Mission Statement

Molloy College, an independent, Catholic college, rooted in the Dominican tradition of study, spirituality, service and community, is committed to academic excellence with respect for each person. Through transformative education, Molloy promotes a lifelong search for truth and the development of ethical leadership.

A Molloy College education challenges students to maintain high personal and professional standards, to be aware of their responsibilities to preserve and protect the environment and to improve the quality of life for themselves and their neighbors in an ever-changing global society.

The faculty of the Division of Nursing, in accord with Molloy College, believes that every person as a biological, psychological, socio-cultural, spiritual being has an innate potential for self-actualization in a dynamic universe. We believe that human beings are entitled to an environment which fosters individual self-esteem and mutual positive regard. We hold in high esteem the inherent worth and dignity of all individuals. It is the concept of valuing, in relation to humanity-environment-health, which gives meaning to humanistic nursing practice.

Each human being is an integrated whole evolving through time. The uniqueness of humanity is reflected through individuals, families, and communities continuously interacting with their environment. Since environment influences the health and well-being of humanity, we recognize our collective responsibility to strive toward an environmentally better world.

Health is a dynamic state of bio-psycho-socio-spiritual-cultural well being. A responsible society provides a health care system that enables individuals to function at their highest level. Nursing meets the actual and potential needs of humanity by assisting a diverse, multicultural population to attain, maintain, and retain optimum health.

Nursing is both a science and an art, which focuses on the diagnosis and treatment of human responses. Humanistic nursing integrates theory and practice within a framework of ethical decision-making. Nursing provides health care for individuals, families, and communities. Central to professional practice are caring, interpersonal communication, and nursing therapeutics. We believe that nursing is a social contract grounded in the profession’s code of ethics and requires a life-long professional commitment.

DOCTOR OF PHILOSOPHY IN NURSING PROGRAM

The Doctor of Philosophy (PhD) in Nursing program at Molloy College prepares nurses for leadership roles in a variety of organizations, health related agencies, and educational institutions.

Doctoral education fosters the highest level of scholarly inquiry to promote self-transformation, enabling graduates to demonstrate excellence in leadership, education and service. A Doctor of Philosophy degree represents the culmination of the formal educational process. Through
The underlying beliefs of the Division of Nursing at Molloy College are rooted in its humanistic framework. Within this framework, the Molloy College doctoral program makes a unique contribution to the nursing profession (see Figure 1 and Figure 2). It is the role of the nurse to stand against the occurrence of dehumanization that may happen in health care settings. In an environment where there may be a devotion to technology and cost containment and where others may be less concerned with the patient as a human being, the Molloy Ph.D. prepared nurse will lead in knowledge development and nursing interventions that demonstrate value and respect for persons vulnerable to illness. Leadership by the Molloy College Ph.D. prepared nurse will be directed toward transforming vulnerabilities to strengths, attaining and maintaining optimum health. Humanistic nursing behavior, rooted in the principles of caring, is a goal of the doctoral program. A curriculum enriched by the study of the humanities assists in achieving that goal.

Goals

Goals of the program are to educate future nursing leaders who will take their place alongside other disciplinary leaders to maintain, monitor, and improve health for all individuals in society.

The objectives of the program are evident in the eight characteristics of the graduate. The recipients of the Molloy College Ph.D. in Nursing are prepared to:

1. Serve as leaders in advancing the practice of nursing through research, education, administration, and health policy.
2. Participate fully in multidisciplinary contributions to the creation of nursing knowledge.
3. Generate, test, and extend knowledge through research and theory development, and to disseminate the findings.
4. Influence health policy to advance nursing and health care in a global society.
5. Integrate theory and practice through advanced ethical analysis.
6. Appreciate and extend the aesthetic values of nursing.
7. Value the inherent dignity of all humans and protect them from dehumanization of health care.
8. Treasure the ideals of nursing through the stewardship of caring.

Graduates of the PhD in Nursing Program:

The underlying beliefs of the Division of Nursing at Molloy College are rooted in its humanistic framework. The Molloy PhD nurse graduate will lead in knowledge development and nursing interventions that demonstrate value and respect for persons vulnerable to illness.

The Molloy College PhD prepared nurse will exert leadership and develop knowledge to:

- Transform vulnerabilities to strengths, attaining and maintaining optimum health.
- Guide humanistic nursing behavior, rooted in the principles of caring, as a goal of the doctoral program.
- Enrich the discipline by the incorporating the humanities to assist in achieving goals.
ADMISSION REQUIREMENTS

The Division of Nursing at Molloy College employs a “whole person” philosophy to evaluate candidates for admission to the doctoral program. A multifaceted assessment of the applicant’s potential for success includes the following:

a. A master’s degree from an accredited program. A higher degree in nursing (baccalaureate and/or master's). Degrees outside of nursing need to be relevant to nursing and health.

b. Minimum Grade Point Average of 3.5 on a 4.0 scale from applicant’s master's program.

c. An official report of scores, no more than 5 years old, from the Graduate Record Examination.

d. Original official transcripts from all college programs and courses.

e. Current license to practice as a registered nurse in the United States.

f. A written statement of career goals after achieving the PhD

g. Description of a proposed area of research.

h. Three letters of reference from professionals in the field that speak to the potential of the applicant as a scholar, to include at least one from a former faculty and at least one from a recent employer.

i. A current curriculum vitae (professional resume).

j. Graduate course in inferential statistics, (3 credit minimum, completed within last 5 years). If this criteria is not met, this will be added to the student’s program of study.

k. A copy of a recent scholarly paper, research report, or publication.

l. An interview with the Associate Dean and Director of the PhD Program and faculty of the Doctoral Program with concurrent completion of an onsite brief writing sample evaluated by a designated PhD admission committee.

m. International students must follow the regular admissions procedure including submission of college transcripts. See the catalog for English evaluations of transcripts. The TOEFL examination for those whom English is not the native language is required with a minimum score of 500.
Students are admitted for the fall semester only. All materials for admission must be submitted to the Admissions Office of Molloy College, by March 1 of the year of application.

Categories of Admission:

a. Admission to Degree Program: This category is used for students who satisfy all Doctoral Nursing Program requirements, and are admitted without any provisions. This includes:

- Completion of the master's degree with appropriate transcript.
- Submitted GRE scores, letters of recommendation, and personal goal statement
- Successful interviews and onsite brief writing sample.
- Completion of a 3 credit graduate course in inferential statistics in the last 5 years.

b. Provisional Admission to Degree Program: This category is used for students who fail to meet all Doctoral Nursing Program requirements, but who, in the opinion of the Doctoral Faculty, demonstrate high potential for doctoral study. Types of students admitted under this category and conditions for full admission include:

- A student who meets all admission requirements, except is in the final semester of a master’s degree and has not yet graduated. Upon graduation with a GPA of 3.5 or higher, the student will be granted full admission.

- A student who meets all admission requirements and has completed the GRE but is waiting for results. A student who meets all admission requirements, except a 3 credit graduate course in inferential statistics in the last 5 years. This course will be added to their program of study.

- A student who meets all admission requirements except has a GPA of 3.25 -3.5 or marginal GRE scores. Upon earning a grade of B or higher in two of the first courses taken, the student will be granted full admission.

Non-Matriculated Students

Students whose admission process is incomplete but wish to earn credits for specific prerequisites or required courses for the degree can request permission of the Associate Dean (Director of the PhD Program) to enroll for one semester. Non-matriculated students should be aware that no more than 6 credits may be completed as a non-matriculated student to fulfill requirements for the PhD and that non-matriculated status can be maintained for a maximum period of one semester.

Transfer Credit:
Courses submitted for transfer credit are evaluated individually relative to program requirements and the student's plan of study. Students may transfer up to 6 graduate credits from another institution. These must be approved by the Director of the PhD Program.

a. The course must either be duplicative of courses required within the program and/or congruent with the student’s focus for cognates that support the dissertation.

b. The course must not have been used toward meeting the requirements for another degree.

c. The student must have received graduate credit for the course at an accredited institution.

d. The student must have earned a grade of B or above.

e. A student requesting transfer of credit should submit the request, an official copy of the transcript and a copy of the course syllabus to the Director of the PhD Program. All transfers of credit must be approved by the Director of the PhD Program and the Associate Dean for Academic Affairs.

**Grading Policy.**

The following grading system is used in all graduate programs.  

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Index</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Superior</td>
</tr>
<tr>
<td>A-</td>
<td>Excellent</td>
</tr>

</tr>
<tr>
<td>WA</td>
<td>Withdrawn – absent from last class meeting or final</td>
</tr>
<tr>
<td>WF</td>
<td>Withdrawn – failing</td>
</tr>
<tr>
<td>WIP</td>
<td>Work in Progress</td>
</tr>
<tr>
<td>P</td>
<td>Pass (competency in meeting course requirements. Is not a letter grade).</td>
</tr>
<tr>
<td>AU</td>
<td>Audit (requires permission of Director of the PhD Program and Instructor). No credits earned and no quality points earned.</td>
</tr>
</tbody>
</table>

*Note: Not accepted for credit toward degree requirements*

**Cumulative Grade Point Average Requirement:**

Students are expected to succeed academically and maintain a minimum cumulative grade point
average of 3.2 (on a 4.0 scale). If the GPA falls below 3.2 it must be raised to 3.2 by the end of the following semester. Students who fail to raise their GPA to 3.2 will be dismissed from the program.

Repeating Courses

A course where a student earns less than a B- must be repeated. A course may be repeated only once. The option to repeat a course may only be used twice during the program.

PhD IN NURSING DEGREE REQUIREMENTS

To earn the PhD in Nursing degree at Molloy College Division of Nursing the doctoral candidate must:

1. Have earned a minimum of 51 graduate level semester credits beyond the master's degree;
   a. Earned 45 graduate level semester credits in courses beyond the master's degree, 36 of these credits must have been earned at Molloy College.
   b. Earned 9 credits for the dissertation requirements. 3 credits are the dissertation seminar and 6 additional credits are beyond the 45 graduate level credits in dissertation “progression” taken in 1 – 6 increments to maintain enrollment until the dissertation defense, depending on the student’s progress of completion.
   c. 6 graduate level semester credits may be transferred and applied to the 45 graduate level semester requirement for the PhD in Nursing program with approval. (see above)

2. Pass a written Doctoral Candidacy Comprehensive Examination after completing all credit requirements for the PhD in Nursing Program, except cognates, NUR 609, NUR 610, NUR 701, the Dissertation Seminar and Dissertation Advancement credits;

3. Present a proposal to a committee and defend it before commencing the dissertation;

4. Complete the Program of Study outlined in the curriculum of the PhD in Nursing program;

5. Approval of the dissertation by the Doctoral Dissertation Committee, Director of the PhD Program, Dean of the Division of Nursing and Office of Academic Affairs. Submit the approved Doctoral Dissertation in the approved format to the Molloy College Library and copies to ProQuest and Director of the PhD Program;

6. Pass the final oral Doctoral Dissertation defense;

7. Complete application materials for graduation and the PhD degree in accordance with prevailing Molloy policies.

PhD PROGRAM OVERVIEW

Theory/Core - 15 credits

This cluster of core courses addresses the theoretical and conceptual bases for nursing practice,
and the underpinnings of professional leadership. *Hallmarks of Scholarly Inquiry* introduces the doctoral student to the scholarly process of dissertation research preparation. *Ethics: The Foundation of Leadership* explores traditional and contemporary ethical principles and core nursing values in order to develop students’ complex analytical skills. *Nursing Concept Analysis Through the Humanities* allows students to investigate phenomena important to nursing through the lens of the humanities. Students also develop theoretical connections and philosophical reflections as bases for future theory construction. Students gain exposure to the United States health care system and the organizational, public and corporate policies that shape and influence it as a background for nursing leadership in the *Scholarship of Health Care Organizations and Policy*. In *Philosophical Evolution of Nursing Knowledge*, elements of philosophy of science are used as a guide to explore the evolution of nursing science. Nursing theory construction is examined as a foundation for research.

**Research - 15 credits**

In the research cluster, students acquire the tools to build their research skills. A strong foundation in both qualitative and quantitative methods is offered in *Qualitative Research Methods*, *Quantitative Research Methods*, and a choice of either *Advanced Quantitative Analysis* or *Advanced Qualitative Analysis*. *Research Residency* affords students learning opportunities encompassing all aspects of the research process. In *Hallmarks of Scholarly Design and Implications*, students have a particular emphasis on dissertation proposal development as well as implications for the nursing profession.

**Leadership and Education – 6 credits**

Leadership themes are threaded throughout the curriculum assuring preparation for leadership in health policy and organizations. *Leadership Innovations and Interventions* allows students to examine the complex interaction of forces shaping organizations and national and global policy. *Nursing Education: Principles, Dynamics, and Innovations* provides students with teaching experience and knowledge necessary for doctoral graduates of the future.

**Cognates – 6 credits minimum**

This component allows students to pursue an individualized plan of study that builds a specialized area of competence and supports their research interests and career goals. A portion of the cognate courses is ordinarily chosen from other disciplines (minimum of 3 credits) that contribute to the development of nursing knowledge through theoretical and/or methodological approaches. These courses may be taken at Molloy or other academic institutions. The choice of cognates must be approved by the advisor and Director of the PhD Program.

**Dissertation Seminar + Dissertation Progression (6)**

The dissertation is the culmination of doctoral study. *Dissertation Seminar* is taken after the completion of all required coursework and successful pass on comprehensive exam, and provides the opportunity for the student to develop and refine the dissertation. Following the *Dissertation Seminar*, the student registers for continuous *Dissertation Progression* until completion of successful oral defense.

ADVISING

The Director of the PhD Program advises all newly admitted students prior to enrollment in the program. Thereafter, the student is assigned to a Faculty Advisor.

The Faculty Advisor:
- Guides the student to plan a Program of Study.
- Maintains a current PhD Planning Form and student record each semester, giving a copy to the Director of the PhD Program for planning.
- Provides academic counseling to facilitate the program of study, transition procedures, and selection of the Doctoral Dissertation Committee.
- Provides advising to facilitate career planning.

When the student's dissertation committee has been approved, the Chair of the Dissertation Committee serves as the student’s Faculty Advisor until graduation.

Student Responsibilities in the Advisement Process to:

-- Initiate written requests in advance for accommodations applicable to the Americans with Disability Act.

-- Supply documents required to fulfill transfer requests for coursework.

-- Read written communiques and adhere to policies and procedures applicable to the Doctoral Program. (These may change during a student's enrollment).

-- Initiate any changes to the Program of Study in writing to faculty advisor (courses, leave of absence, reentry, resignation).

-- Communicate with faculty advisor at least once during each semester to discuss progress and program planning.

-- Obtain advisor signatures on required forms.

-- Communicate any personal changes during the program in a timely manner with the advisor and Director of the PhD Program, especially phone, email and address information.

-- Meet deadlines for requests, forms, applications including documents related to research residency, progression in the program, and Comprehensive Exams.
PhD PROGRAM POLICIES FOR STUDENTS

Enrollment in a maximum of 12 graduate level semester hours during any semester is not permitted unless special permission is given by the Office of Academic Affairs.

1. **Length of Time to Complete Requirements**

   A student has a period of nine (9) years after admission to complete program requirements. A student must be admitted to candidacy within five years after admission to the doctoral program and at least one academic year before the anticipated date on which the degree is to be conferred. The student must complete all program requirements within four years following admission to candidacy. Any variation from this must be approved in writing by the Office of Academic Affairs.

2. **Continuous Registration**

   Continuous registration Fall and Spring semesters is required of all students enrolled in programs leading to degrees unless an authorized leave of absence has been granted. If the student is unable to engage in doctoral study for a given semester for health or personal reasons, a *Leave of Absence Form* must be completed and approval must be obtained from the advisor and the Director of the PhD Program. The student must be registered for credit during the term (Fall, Spring or Summer) in which the dissertation defense is scheduled and degree requirements completed.

3. **Plan of Study**

   With his/her faculty advisor, each student plans collaboratively with his/her faculty advisor a plan of study which constitutes a unified program, planned within the framework of doctoral program requirements and the student's research interests and career goals. The selection and sequence of courses are planned with the student’s advisor after completion of the first semester. Advisors can assist students in selecting courses and cognates in conjunction with developing their research proposal. In planning an individualized program of study specific to the students’ needs, advisors should guide the student to develop an area of research to begin formulating a proposal as early as possible. Before enrollment for the second year, the Advisor and Director of the PhD Program meet and approve the plan of study. Changes thereafter must be approved by both the Advisor and Director of the PhD Program.

   Only 6 graduate level credits may be transferred and applied toward the 51 credit PhD program. It is suggested that at least 3 credits of the cognates shall be from another discipline.

4. **Comprehensive Examination**

   The purpose of the Comprehensive Examination is to determine whether the student meets minimum criteria for knowledge of Nursing Science and research methods at the doctoral level. The written examination is designed to test the student’s knowledge related to analysis and synthesis of the curriculum content. The content will include theory, research, and
specialized substantive knowledge. Students must have completed all course work except cognates, NUR 609, NUR 610, NUR 701 and the dissertation seminar before taking the examination.

The procedure for the Comprehensive Examination is as follows:

a. During the semester the student will ordinarily complete all course work except NUR 609, NUR 610, NUR 701, NUR 800, NUR 801 and cognates, the student will file a Notification of Intent to take Doctoral Comprehensive Examination Form. The examination will be scheduled with consultation of the student and Director of the PhD Program after the end of the semester.

b. The examination will be graded by members of the Doctoral Comprehensive Examination Committee. The examination will be graded as either “eligible for candidacy” or “not eligible for candidacy” by the committee. If there is not a unanimous decision about the grade, the PhD Director will reconcile differences in evaluations.

c. A student may be assessed as “not yet eligible for candidacy” only once. A student receiving a grade of “not yet eligible for candidacy” will meet with the academic advisor, who will provide feedback and guidance to assist the student in preparing for a second administration of the Comprehensive Examination.

d. A second grade of “not yet eligible for candidacy” will result in dismissal from the program.

e. The written comprehensive examination must be successfully passed before a student begins their dissertation. After successfully passing the examination, the student is considered eligible for candidacy.

5. Application for Candidacy

With successful completion of the Comprehensive Examination, the student is deemed by faculty as qualified to conduct the research necessary for the dissertation and submits an application for candidacy to the Director of the PhD Program. The student must be admitted to candidacy at least 2 semesters prior to anticipated graduation. Upon review that the student has fulfilled all criteria, a Certificate of Candidacy will be issued. The student will then maintain matriculation through the dissertation process.

6. Dissertation

Each student is required to conduct original, independent research which contributes to knowledge development in nursing. The student will select a Dissertation Chair and members of the Dissertation Committee with approval of the Director of the PhD Program. The Dissertation Committee Membership Form must be submitted for signature to the Director of the PhD Program. A written dissertation proposal must be approved and signed off by the
Institutional Review Board (IRB) and all members of the student's Dissertation Committee. The approved proposal must be presented and defended before being initiated.

7. **Dissertation Defense**

Each student is required to successfully defend the completed dissertation as evaluated by the Dissertation Committee. The final oral dissertation defense is scheduled following completion of the dissertation and approval by all members of the student's Dissertation Committee. The dissertation defense is an oral presentation and inquiry open to all faculty, students, and community as deemed appropriate by the Director of the PhD Program.

8. **Graduation**

The final completed dissertation with all changes requested by the committee must be approved by the Dissertation Chair. Copies following Molloy College standards must be submitted to the Molloy College Library, Director of the PhD Program and *Dissertation Abstracts* before graduation. The student must submit an approved Application for Graduation with all required signatures and an application fee, according to the deadlines in the Academic Calendar.

The commencement ceremony held annually in May is managed by the Office of Student Affairs. Special dates are planned for the distribution of caps and gowns, celebrations, commencement rehearsals, hooding and class night and ceremonies.

9. **Length of Time to Complete Requirements**

A student has a period of nine (9) years after admission to complete program requirements. A student must be admitted to candidacy within five years after admission to the doctoral program and at least one academic year before the anticipated date on which the degree is to be conferred. The student must complete all program requirements within four years following admission to candidacy. For any variation from this, students must follow College procedures for withdrawal, leave and/or re-entry as specified in general College policies and specified in the Graduate Catalog.

10. **Continuous Registration**

Continuous Fall and Spring semester registration is required of all students enrolled in programs leading to degrees unless an authorized leave of absence has been granted. If the student is unable to engage in doctoral study for a given semester for health or personal reasons, the student must follow College procedures for withdrawal, leave and/or re-entry as specified in general College policies and specified in the Graduate Catalog with approval of the advisor and the Director of the PhD Program. The student must be registered for credit during the term (Fall, Spring or Summer) in which the dissertation defense is scheduled and degree requirements completed.
Students must maintain continuous registration until graduation of one hour of credit in NUR 802 for each semester while engaged in dissertation activity AFTER the required 6 hours are completed in NUR 801. Students are dismissed from the PhD program upon failing to enroll for two consecutive academic semesters. However, a dismissed student may reapply and be reviewed for readmission. If readmitted, the student continues to be subject to the stated time limits.

11. **Incomplete Grades**

Students who do not complete course requirements on time because of illness or other extenuating circumstances may be given a grade of Incomplete (I) by the instructor. A grade of “I” will be granted only in case of hardship (circumstances which, in the judgment of the instructor warrant special consideration). Policies regarding incompletes are congruent with College policies and found in the Graduate Catalog. All work to rectify incomplete grades must be in compliance with College policies. Students are advised whenever possible to complete requirements within the time allotted for the course. Incomplete grades must be rectified before taking the Comprehensive Exam. Incomplete grades do not count toward graduation.

12. **Waiver of Course**

Occasionally, a student is admitted to the Doctoral Program who presents the credentials of having experience that is equivalent to the required course. In this instance, the student may request a waiver of course. The Advisor and the student are then notified in writing of the action taken. Any student receiving a favorable waiver of course action will be required to take a course, with advisement, that will provide the appropriate number of credits to substitute for the waived course. A Waiver/Substitution Form may be submitted by the student’s advisor and PhD Director for approval by the Office of Academic Affairs. These requests are reviewed and are subject to denial. If approved, an acceptable course may be substituted for the required course or a requirement may be waived.

13. **Health of Student**

A student in the program who is unable to meet course objectives due to health problems will be requested to either take an "incomplete" in the course or withdraw from the course depending upon which is more appropriate.

14. **Licensure as a Registered Nurse**

A student in the Doctoral Program must maintain current licensure as a registered professional nurse in New York State and in any other state where the student may be involved in clinical activities.

15. **Malpractice Insurance**

Evidence of malpractice insurance may be required according to students’ program of study.
**Honor Code**

The Honor Code is an integral part of Molloy College and upholds a tradition that has existed in the institution. Each doctoral student has the responsibility to conform to and uphold the Honor Code as published in the Molloy College catalog. Attempted or actual cheating, plagiarism, lying, and stealing of academic work constitute Honor Code violations. Each student is responsible for reviewing the Honor Code as published.

**Molloy College Catalog**

Each student is required to obtain a copy of the Molloy College Catalog during the first semester of the program and is expected to review policies and procedures described. Students are accountable for adhering to the published, current policies and procedures in force during their program of study.

**Transfer Credits**

The maximum number of credits transferable toward the Doctoral Program of Study is 6 credits. Transfer credits must be approved by Director of the PhD Program before being accepted.

To be accepted for transfer, previous credits must have been earned within six years prior to admission to the PhD program. Credits previously applied toward a degree at another institution or at Molloy College are not allowed as transfer credits. A minimum grade of B must have been earned in the courses requesting to be transferred. The student is responsible for furnishing a syllabus for the course and a course description from the catalog of the school at which the transfer courses were taken. An official transcript of courses/grades is also required.

**PhD Student E-mail, Study Area, and Administrative Assistant**

Students must use their Molloy E-mail address that will serve as official correspondence during the program. It should be checked frequently. A doctoral student study area is housed in the Graduate Nursing Center (GNC). Doctoral students may reserve these rooms for personal use. Keys are available on weekends for the building and doctoral rooms at the main Molloy security desk. Identification cards are issued for requesting access to the building and rooms. Reservations for scheduling the rooms during school hours are made through the Doctoral Program Administrative Assistant, Drue Kerls-Spoto, who is located in the GNC (Ext 6258). She is also available to assist with faculty communication and for student reference and software requests as needed.
IMMUNIZATIONS AND HEALTH REQUIREMENTS

The Molloy College Division of Nursing health policy has been established to minimize risks to students' health and to comply with regulations of both the agencies to which students are assigned as well as the State of New York immunization requirements. The Department of Health requires completed forms at the time of registration. Immunization forms are available from Student Health Services Room K310 including:

- a. Immunization for measles, mumps and rubella.
- b. Meningitis form, signed (vaccine is not necessary but form must be signed).
- c. Latex Allergy form completed and signed.

Each student is responsible for her/his health care. Students are strongly advised to maintain health insurance coverage at all times. The College assumes no financial responsibility for the health care of students. An accident and health insurance plan is available through the Student Health Center.

To the student:
To assure compliance with the health requirements for the contracted health care agencies, all students must submit their records for review before any clinical contact outside of their own work areas. Physical forms are available from Jeanne Ryan – Room Casey 224 – and must be returned before any activity in which the doctoral student may be involved in a clinical visit such as research data collection can be approved. Students must present positive titer reports to Measles, Mumps, Rubella and Varicella. Lab reports/printed out must be attached to the physical form.

To the Physician/Health Care Provider:
Please administer any needed immunizations, record the immunization information on this card, and sign it. Failure to comply with this requirement will impact the student's enrollment for subsequent semesters. Molloy College Division of Nursing requires that every student meet the following:

- Physical examination within the last year (then every 3 years)
- Rubella: one dose after the first birthday OR a Titre showing Seropositivity is acceptable. A history of the disease is not acceptable.
- Polio: original series of three
- Mumps: one dose.
- DPT: original series of three
- PPD (TB screening): required within the past year then yearly. (Note: if PPD is positive, a chest Xray report is required.)
- Tetanus/Diphtheria: last booster within ten years
- Hepatitis B vaccine: Series of three
- Measles: two doses are required after 12 months of age and after 1967 OR a Titre showing seropositivity is acceptable. A history of the disease is not acceptable.
NURSING DOCTORAL COURSE DESCRIPTIONS

NUR 600 HALLMARKS OF SCHOLARLY INQUIRY
This seminar introduces the doctoral student to the scholarly process of dissertation research preparation. The focus includes stewardship, reflection, critique and creativity. Students develop connections between theory and research with an emphasis on problem identification as well as professional goal trajectory focus. 3 credits

NUR 601 ETHICS: THE FOUNDATION OF LEADERSHIP
This course explores traditional and contemporary ethical principles and core nursing values in order to develop complex analytical skills within students. These skills are needed to address moral issues and dilemmas in health care research and delivery as well as in the arenas of leadership, politics, scholarship and organizations. Advanced ethical theories and their applications and topics in the area of research ethics are addressed. 3 credits

NUR 602 NURSING CONCEPT ANALYSIS THROUGH THE HUMANITIES
An exploration of concept analysis and its development through the humanities is the focus of this course. Certain phenomena are of central concern to the nursing profession: hope, joy, wellness, grief, suffering and vulnerability. These concepts, and others, are analyzed through the mindful study of the humanities: art, music, dance, poetry and literature. The unique and integral role of the humanities in uncovering the meaning of the human experience is the central focus. Students investigate phenomena of concern and illuminate them through the study of the humanities. Students develop theoretical connections and philosophical reflections for future theory construction. 3 credits

NUR 603 SCHOLARSHIP OF HEALTH CARE ORGANIZATION AND POLICY
Students explore the United States health care system and the organizations and public and corporate policies that shape and influence it as a background for nursing leadership. Students explore theories related to organizations, policy planning, implementation and evaluation. Complex health issues and their relationship to public policy are analyzed and synthesized with an emphasis on future trends. (Course includes combined class and experiential hours developed as an intensive policy experience in Washington, D.C.) Fees - To Be Determined. 3 credits

NUR 604 PHILOSOPHICAL EVOLUTION OF NURSING KNOWLEDGE
Elements of philosophy of science are used as a guide to exploration of the evolution of nursing science. Nursing theory construction is examined as a foundation for research. The integration of the roles of praxis, scholarship and stewardship of the profession is investigated, with an emphasis on generation of knowledge. Students evaluate theories that complement nursing, including theories related to development, social learning, behavior change and health promotion. Integrated course content assists students in development of the theoretical basis of the dissertation. 3 credits

NUR 605 QUALITATIVE RESEARCH METHODS
This introductory, overview course examines qualitative research methodologies, including ethnography, grounded theory, historiography and phenomenology, as well as various design aspects of qualitative nursing research. Students study published, qualitative, empirical research in nursing and related disciplines with emphasis on paradigm distinctions, theoretical
perspectives, various research approaches, designs and methods, critique of research reports, and ethical issues in qualitative research. Learning experiences include fieldwork exercises in data collection, management and analysis that lead to the development of a modified, qualitative research proposal. Fee - To Be Determined. 3 credits

**NUR 606 QUANTITATIVE RESEARCH METHODS**
This course examines the foundation of research design and methodology used in scholarly scientific inquiry. Advanced quantitative research designs are critically analyzed, with an emphasis on correspondence between research questions and optimal designs. Applicability of processes of inquiry to future independent endeavors is emphasized. **Prerequisite** Graduate level statistics course. Fee - To Be Determined. 3 credits

**NUR 607 ADVANCED QUANTITATIVE ANALYSIS**
This course is designed to build upon the introductory courses in statistics and research. It focuses on multivariate analytic technique and analysis. Students analyze complex relationships among multiple variables and synthesize factors contributing to an understanding of those relationships, including the application of advanced statistical methods. Students demonstrate the ability to interpret the results of multivariate analysis and apply such statistical analysis in the research process. **Prerequisites:** NUR 606; Fee - To Be Determined. 3 credits

**NUR 608 ADVANCED QUALITATIVE ANALYSIS**
This course explores advanced qualitative data analysis methods, including analysis of field notes and text, using computerized and alternate techniques. Students analyze, critique and synthesize qualitative data using a variety of contemporary and evolving methods. Analytical strategies are based on relationship to the research design and related to potential dissertation research questions. **Prerequisite:** NUR 605. Fee - To Be Determined. 3 credits

**NUR 609 RESEARCH RESIDENCY**
The research residency course provides opportunity for doctoral students to immerse themselves directly in research activities under the supervision of (multiple) 3 research mentors. Relevant research experiences include developing a research question and plan, writing a research proposal, preparing an IRB application, preparing for the conduct of research, data coding and preparation, conducting human research, analyzing data, publishing and disseminating research, and planning for future research. Flexibility is possible in formulating the research immersion experience in either a 3 credit block or in 1 credit per semester experiences. 1-3 credits. Course is Pass/Fail.

**NUR 610 HALLMARKS OF SCHOLARLY DESIGN AND IMPLICATIONS**
This seminar continues the process, begun in the Hallmarks of Scholarly Inquiry, of students’ deepening connections to their dissertation research with an emphasis on scholarly design and proposal development. The context of the dissertation design and implementation is viewed within the issues pertinent to the nursing profession. Exploration of these issues and their implications aid in the integration of the contribution of the students’ doctoral work to the nursing profession. 3 credits
NUR 699 ADVANCED DIRECTED STUDY TOPICS
This course can be designed to fulfill the cognate requirements. Open to students to pursue advanced focused readings of significant relevance to the student's dissertation area of study. Literature development, discussion and advanced applications of the study problem, health policy or methods are guided by a member of the faculty in the doctoral or graduate programs. Approval of advisor and the Director of the PhD Program required. Can be repeated for up to 6 credits. 1-3 credits

NUR 700 LEADERSHIP INNOVATIONS AND INTERVENTIONS
Students in this course use analytical frameworks and theories to examine the complex interaction of forces shaping organizations. Elements of leadership such as cultural competence, strategic thinking, communication, economic planning as well as consensus and coalition building are integrated. Collaborative and trans-disciplinary facets of leadership are explored. Students build on their previous analytical endeavors as they design, implement and evaluate programs that contribute to innovations in educational processes. 3 credits

NUR 701 NURSING EDUCATION: PRINCIPLES, DYNAMICS AND INNOVATIONS
Students critically explore the evolution of educational practice in the context of political, philosophical, scientific and cultural forces. Pedagogical theories are analyzed and synthesized. Contemporary and evolving educational interventions are investigated as students in this course explore and critique the dynamics of higher education. Innovations in education, shifting paradigms, trans-disciplinary interface and the multiplicity of educational roles are explored. Informed by the underlying theoretical framework of situated learning, this experience encourages students to explore complex scholarly leadership within the context of an academic setting, health care organization or policy arena. Students build on previous analytical endeavors as they design, implement and evaluate programs that contribute to innovations in educational processes. 3 credits

NUR 800 DISSERTATION SEMINAR
Students who have completed the majority of their course work and attained candidacy attend Dissertation Seminar. Dissertation seminar provides formal, collaborative opportunity, with faculty guidance, to critically examine assumptions, biases and ideas relating to doctoral work in process. The seminar format exposes the dissertation researcher to a diversity of feedback. Seminar students have the opportunity to refine their critiquing skills as they examine their own work. 3 credits (Can be taken as 1 credit, 2 credits or 3 credits). Course is Pass/Fail.

NUR 801 DISSERTATION PROGRESSION
Students enrolled in this course are in the active process of conducting research under committee direction that will culminate in the dissertation. Students must be engaged with the chair of the dissertation committee to meet benchmarks relative to course credit throughout the process. Upon completion of credits and until successful defense of the dissertation, students can remain actively enrolled via the continuous enrollment fee to maintain continuous matriculation until completion of all degree requirements. Grading is Pass/Fail. Course may be repeated as needed. 6 credits (Can be taken as 3 credits or 6 credits).
MAJOR TRANSITION POINTS IN PHD PROGRAM

Admission and Enrollment

Program of Study approved by Advisor and Director of PhD Program. Successful completion of all coursework ordinarily except N609, N610, N701, N800, N801 and Cognates

Application & successful passing of Doctoral Comprehensive Examination
Advancement to Doctoral Candidacy (within 6 years of admission). Request that advisor send a completed Program of Study to Director of PhD Program.

Approval of Dissertation Committee (Send letter requesting Committee members, including rationale for selection of members, to Director of the PhD Program)
Enrollment in N800 as dissertation proposal approved by Dissertation Committee.

Obtain signatures of committee members on Dissertation Proposal Approval Form and forward to Director of the PhD Program.
Plan and Present the Proposal Defense to Committee prior to or in conjunction with N800.

Approval of Dissertation Progression Enrollment in N801.

Approval from Human Subjects - Institutional Review Board(s) (IRB)
Conduct dissertation

Scheduling and successful completion of Oral Defense of Dissertation. One copy of the Dissertation submitted to PhD Program Office, and the Molloy College Library to be available to the community at least 2 weeks before Oral Defense. Announcements sent to all departments. Oral Defense open to members of the Molloy College community.

Final Dissertation approval in accordance with required changes and format Submission of completed dissertation

GRADUATION
(within 5 years of advancement to Doctoral Candidacy)
**RESEARCH RESIDENCY**  
*(Application Form Required)*

*Research Residency – 1-3 Credits (total of 3 required)*  
The Research Residency is an experiential learning activity guided by a Division of Nursing faculty member course instructor in which the student works with a researcher who serves as a preceptor. Flexibility is possible in formulating the research immersion experience in either a 3 credit block or in 1 credit per semester experiences. One credit is approximately 30 hours of work plus 3 planned seminar meetings. The research residency course provides opportunity for doctoral students to immerse themselves directly in research activities under the supervision of a research mentor. Relevant research experiences include developing a research question and plan, writing a research proposal, preparing and submitting an IRB application, preparing for the conduct of research, conducting human research, data preparation and coding, analyzing data, publishing and disseminating research, and planning for future research.

In the regular semester preceding registration for N609, the student must submit a completed application to the Director of the PhD Program. Students planning to enroll in the residency are interviewed by the Director of the PhD Program to determine their research goals and objectives, analyze their professional and educational backgrounds and experiences, and identify an appropriate experience.

Students will collaborate with faculty and their preceptor to develop individualized objectives based on the course objectives of the Research Residency. Faculty will confer regularly with the students and the preceptors to plan experiences, monitor performance, and generally serve as a resource to students in the Residency. Students produce a scholarly, analytical paper integrating the experience with their personal learning objectives related to the research endeavor.

If the student is involved with a residency that involves a clinical setting, the student must meet the requirements of the facility, including the maintenance of professional liability insurance. It is the policy of the Division of Nursing that at the orientation for each residency, the *Universal Precautions for Care of All Patients* as outlined by current CDC guidelines for the Prevention of HIV transmission in Health Care Settings be reviewed by the student.

Please schedule an appointment with your advisor to discuss your eligibility to enroll in the Residency well in advance of the filing dates:

<table>

</tbody>
</table>
DOCTORAL COMPREHENSIVE EXAMINATION
(Application Form Required)

The doctoral comprehensive examination provides documentation of a student’s scholarly analysis of substantive content within the field of nursing theory, health policy, ethics, leadership and research. All doctoral students are required to successfully pass the comprehensive exam in order to move to doctoral candidacy. Six hours are allotted for completing the examination. A student who has successfully completed 30 credits of required courses is eligible to take the Doctoral Comprehensive Examination. The exam is typically scheduled during the intercession in January, with re-tests in June. Each student is responsible for implementing the examination application process. Final dates for filing the Comprehensive Examination Application are as follows:

<table>
<thead>
<tr>
<th>Annual Filing Dates</th>
<th>Annual Examination Dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>November 1</td>
<td>January date</td>
</tr>
<tr>
<td>March 1</td>
<td>June</td>
</tr>
</tbody>
</table>

Students will successfully implement the application process by submitting a complete Comprehensive Examination Application form available in the Director of the PhD Program’s Office – GNC 111A. Please note that the application requires the faculty advisor's signature indicating that the program of study conveys eligibility to take the examination. Please schedule an appointment with your advisor in advance of the filing dates to review the eligibility of your academic record with your advisor and to obtain the required advisor signature. Return completed application to the Director of the PhD Program’s Office.

Students may meet as a group with the Director of the PhD Program to discuss the Doctoral Comprehensive Examination preparation process. Generally, students are encouraged to prepare for the examination by:

- Critically reviewing, analyzing and synthesizing the prevalent theory and research supporting required substantive areas of the Doctor of Philosophy Program.

- Preparing from course materials and learning experiences as well as timely reviews of current literature in the fields that have influenced the evolution of knowledge in the areas studied.

- Conducting individual and small group study activities as learning style preferences indicate.

- Allocating sufficient time to prepare prior to examination.

Each candidate can expect to receive written, mailed notification of the examination outcome (Eligible for Candidacy or Not Eligible for Candidacy) three weeks after the examination date. Should a written notice not be received at the end of the three week period, please contact Director of the PhD Program of the PhD Program.

Students who are not successful in passing the comprehensive examination can proceed in coursework in the subsequent semester and reapply for the examination at the conclusion of that semester.
ADVANCEMENT TO DOCTORAL CANDIDACY

Advancement to candidacy implies a doctoral student has demonstrated both a breadth and depth of knowledge in the field of study and is capable of exploring problems on the boundaries of knowledge.

The following criteria support a student request to be advanced to doctoral candidacy:

1. Successful completion and a grade of “eligible for candidacy” on the Doctoral Comprehensive Examination.
2. Signed approval by doctoral advisor that the Program of Study is completed, submitted to the Director of the PhD Program.

The student will receive written notice when advanced to the Doctoral Candidacy stage of the PhD program.

THE DISSERTATION PROCESS

The doctoral dissertation process actually begins with admission to the doctoral program. Admission to the program includes close attention to the research interests of the student. Early in the program planning process, the student’s Academic Advisor and the student should discuss the student’s potential research interest. The Academic Advisor will recommend faculty qualified to direct the student and who have expertise in the subject matter. Within the first year, the student should meet such faculty and discuss the relevance and research potential of the student’s particular interest. One outcome of these discussions should be the selection of the Dissertation Chair, and another should be determination of support courses to enrich the research study.

The goal of the Hallmarks seminars (NUR 600 and NUR 610) is to have students develop and refine a researchable question that will become the focus of their dissertation. The Dissertation Chair should be selected prior to enrolling in dissertation advisement (NUR 801).

RESPONSIBILITIES OF FACULTY AND STUDENTS FOR DOCTORAL DISSERTATION ADVISEMENT

Responsibilities of Faculty Members in each Course

1. Guide the student in the selection of a topic for investigation that conforms to the quality of research by the College and the Division of Nursing
2. Guide the student in a manner that is consistent with the development of independence, initiative, and excellence on the part of the student.

Responsibilities of Students

1. Before a topic is selected and submitted to the committee, the student should thoroughly review relevant published material.
2. The student, in consultation with the Dissertation Chair, is responsible for the choice of methods and techniques used in the investigation.

3. The student is responsible for keeping the Dissertation Chair and Committee advised of the progress of research and for arranging meetings of the Dissertation Committee when necessary.

4. The student is responsible for conforming to the regulations of the College and the Division of Nursing regarding the dissertation process and the preparation of the completed dissertation.

5. The student is responsible for writing and editing the dissertation in compliance with the requirements for submitting a final copy of the dissertation to the Molloy College Library.

THE ROLE OF THE DISSERTATION COMMITTEE

This committee, selected on the basis of expertise relevant to the dissertation research, serves in an advisory capacity to the student and assures that the dissertation research and written dissertation are of sufficiently high quality to demonstrate to the scientific community at large the student’s competence as independent researcher. The responsibilities of the committee are:

1. To advise and ultimately approve (when appropriate) the dissertation research plans and the written dissertation proposal, including the process of the Proposal Defense.

2. To be available to the student for consultation regarding the research and the dissertation.

3. To read the dissertation, provide feedback and, when appropriate, to designate the dissertation to be defensible.

4. To communicate all Dissertation Committee decisions in writing to the student and the Director of the PhD Program.

5. Members of the Dissertation Committee are evaluators at the student's Final Oral Defense.

The Dissertation Committee is comprised of three members: the Dissertation Chair and two members. The Dissertation Chair and one committee member should be faculty members from the Division of Nursing. One committee member may be from outside the Division of Nursing or Molloy College, as approved by the Director of the PhD Program. All committee members should hold doctoral degrees unless a significant rationale is presented for a member’s particular area of expertise that would benefit the student’s research. The Dissertation Chair should be experienced in directing research and have expertise in the specialty area and subject matter of the dissertation. The committee members should offer expertise related to the research problem
in general, the specific variables under study, and the research method being proposed. The composition of the Dissertation Committee is subject to approval by the Director of the PhD Program and Office of Academic Affairs.

A curriculum vitae must be submitted to the PhD Program office for a committee member who is not a faculty member of Molloy College. The curriculum vitae will also be submitted to the Office of Graduate Academic Affairs.

The Dissertation Chair must be experienced in conducting research and minimally at the rank of Assistant Professor or higher. Eligibility to serve on doctoral committee is based on research productivity and/or expertise deemed central to the student’s research area. Adjunct faculty and visiting professors may be members but may not be chairs of dissertation committees.

**APPROVAL OF THE DISSERTATION PROPOSAL**

Endorsement of the proposal by the student’s Dissertation Committee is required before the student may proceed to schedule a Proposal Defense, open to select members of the Molloy College community. Under the direction of the Dissertation Chair and with consultation from the other members of the committee, a draft of the first three chapters of the dissertation (Introduction, Review of the Literature, and Research Design) is prepared and approved. A two-page dissertation proposal summary with supporting materials is then prepared. Supporting materials should include the following: a reference page, the consent form(s) if indicated that will be used in the study, copies of all instruments and structured interview protocols that will be used if appropriate, and a letter expressing support and/or interest as appropriate in the study from a representative of the proposed setting where data will be collected.

The student must contact the Dissertation Committee members and the reviewers to schedule a meeting time. Committee members should have two weeks advance notice to arrange a meeting time. Once the date and time of the meeting have been determined, the student completes the *Scheduled Meeting of the Proposal Defense Form* and returns it to the Office of Academic Affairs. The expectation is that all members will be present for this review. The student is responsible for submitting the completed form with a copy of the proposal summary and supporting materials and a draft of the first three chapters of the dissertation to the Office of Graduate Academic Affairs. The original copy of the form will be placed in the student’s file along with the original proposal summary and supporting materials and the draft of the first three chapters of the dissertation.

The Dissertation Chair presides over the Proposal Defense. In the first segment of the meeting, the student presents the merit, soundness, and significance of the dissertation topic and proposed methodology. This is followed by questions, comments, and discussion by the committee members. Inherent in the discussion should be recommendations for revisions/changes that will strengthen the quality of the student’s research. After a closed session for discussion, the action of the committee is recorded on the *Recommendation of the Division of Nursing Dissertation Committee Form*. The committee may make one of two recommendations:
1. **Approve.** Proposal and supporting materials are accepted as submitted or with minor revisions/changes as recommended. A unanimous vote is needed for approval. Any recommended revisions/changes are made with guidance from the Chair.

2. **Revise.** Substantial changes are required. A revised proposal may be submitted and the Chair and members of the Dissertation Committee may be reconvened or approve the proposal as revised in writing. The Defense is not repeated unless the entire topic is changed.

Following approval of the proposal summary and supporting materials by the Committee, the student submits the *Proposal Approval* form to the Director of the PhD Program with signatures of the Chair and Committee members. The originals and five copies of the form, the proposal summary, reference page, instruments, and informed consent are submitted by the student to the Director of the PhD Program. The form is then endorsed by the Director of the PhD Program. This office will route copies of materials to the Office of Graduate Academic Affairs for filing approval and with copies to the Dean of the Division of Nursing.

**Human Subject Review:**

-- All Doctoral Dissertations involving human subjects, whether directly or indirectly, must be reviewed by the appropriate Human Subject Review/Institutional Review Board (IRB) at Molloy College and the IRB of any other organization in which the research is conducted.

-- The Chair of the dissertation committee guides the student through the procedure required to obtain IRB approval in necessary offices.

-- Institutional Review Board Guidelines must be met and approval received in writing from the Director of the IRB. Agreements as to the IRB responsible for the research will be executed if multiple IRBs are involved.

-- Questions about the review form, deadlines for receipt of review forms or IRB meeting dates can be answered by calling the Director of the IRB.

-- Research cannot begin until all University and health care agency consents are obtained and verified in writing.

After any needed changes are completed and approved by the dissertation committee, the student will submit the final 2 page proposal, reference page, instruments and informed consent to the Committee for the Protection of Human Research Subjects. Any outside Institutional Review Board (IRB) approval and agreements as to which IRB will be responsible for the study will be solicited with guidance by the Chair.

The action taken on the proposal by the Molloy College Committee for the Protection of Human Research Subjects will be communicated to the candidate by mail. The student will complete any
required revisions and resubmit. After the final approval letter is received by mail, copies will be forwarded to the Director of the PhD Program and to the Dissertation Chair. If any agreement as to the IRB responsible for the study is executed, copies of the agreement will also be sent to the Director of the PhD Program and the Dissertation Chair. The approval by the Committee for the Protection of Human Research Subjects is limited to one year. If the candidate requires more time to collect or analyze data, an extension should be requested prior to the expiration date. This extension request should be forwarded to both the Dissertation Chair and the Committee for the Protection of Human Research Subjects.

COMPLETING THE DISSERTATION

Upon final approval of the Dissertation Committee and the Institutional Review Boards involved in the study, the student may begin data collection. Primary direction of the candidate’s work is vested in the Dissertation Chair. However, final approval of the dissertation is the responsibility of all members of the committee. The student should keep all members advised of progress. Periodic committee meetings for this purpose are arranged by candidate with guidance from the chair.

Any changes in membership of the Dissertation Committee must be approved by the Director of the PhD Program. The Request for Change in Doctoral Dissertation Committee Form is used to initiate approval of a proposed change in membership of the committee is available.

GRADUATION

At the date identified in the College Catalog before the doctoral candidate expects to finish all degree requirements, including the final oral dissertation defense, the candidate submits a Graduation Intent Form to the Registrar. Intent to graduate must be filed with the final registration of required dissertation progression credits. The dissertation must be defended and the final copy must be submitted to the Office of Graduate Academic Affairs by the last day of the semester. The application forms are obtained from the Office of the Registrar and must be submitted to in accordance with graduation policy in the Graduate Catalog by the date in the Academic Calendar. Graduates are encouraged to submit dissertation information to Sigma Theta Tau International and are required to submit dissertations to ProQuest per the instructions on the “Dissertation Guidance” document.

Candidate Responsibilities:

- Consult academic calendar (found in Molloy Graduate Catalog) for deadline dates.
- Submit a Graduation Intent form with appropriate signature(s) to Director of the PhD Program.
- Pay fees required for abstract copyright and ProQuest submission as a condition of graduation.
- Order graduation attire per instructions from Office of Student Affairs.
- Complete survey of earned doctorates
**Director of the PhD Program responsibilities**

Notify Registrar's Office acknowledging completion of program requirements and eligibility to graduate

**THE DISSERTATION ORAL DEFENSE**

After the dissertation has been completed and has been deemed ready for defense by the Dissertation Committee, the oral defense will be scheduled through the PhD Program Office and the Office of Graduate Academic Affairs. The oral defense must be scheduled at least two weeks prior to the proposed date. The candidate obtains a copy of the *Oral Dissertation Defense for the Doctorate: Request for Approval Form* from the PhD Program Office. The completed form along with the materials for the oral defense abstract/summary is to be submitted to the Office of Academic Affairs. The candidate is responsible for making a copy of the dissertation available to the College community in the Molloy College Library two weeks before the defense. Announcements are sent to every department in the College.

The oral defense should be scheduled for two hours and is open to the Molloy College community. Prior to the candidate’s presence, the Dissertation Chair of the committee will discuss with the other members the procedures to be followed during the defense. The candidate presents a summary overview of the research followed by periods of questioning by the Dissertation Committee and attendees. Upon concluding the presentation and period of questioning, the candidate and participants leave the room, and the Committee votes as to whether the candidate has passed or failed the oral defense. A face page with all Dissertation Committee signatures indicating approval of the written document and oral defense must be obtained for the final copy.

If the candidate has an unsuccessful oral defense, permission must be obtained from the Dissertation Committee and the Director of the PhD Program to repeat the oral defense. Two failures constitute failure as a candidate.

**Oral Defense of Dissertation:**

The oral dissertation defense is set after dissertation draft is approved by Dissertation Committee.

The scheduling of the Oral Defense is approved by Chair of the Dissertation Committee.

The date and time of the Oral Defense is established by candidate, Dissertation Committee and Director of the PhD program.

*Approved Oral Dissertation Defense for the Doctorate: Request for Approval Form* with appropriate signatures is provided to Director of the PhD program.

**Director of the PhD Program's Responsibility for Oral Defense:**

Notify the Dean of the Division of Nursing, and Office of Graduate Academic Affairs.
Prepare and distribute notification package and announcement of Dissertation Defense to the Molloy College Faculty and other affiliated units.

Produce Defense Program (abstract, student demographics),

**Candidate's Responsibility for Oral Defense:**

Submit the approved draft copy of the dissertation at least 2 weeks prior to oral dissertation defense to all committee members.

Place copy of approved dissertation draft in PhD Program Office at least 2 weeks prior to oral defense.

Place two printed copies of the approved draft dissertation in the Molloy College Library Reserved Section under dissertation committee Chair's name at least 2 weeks prior to oral defense.

Secure the room for the oral defense.

**PREPARATION OF THE DISSERTATION – FORM and STYLE**

The form and style of the Dissertation must follow the “Molloy College Dissertation Guidelines” which specify the details of format and style. A copy of this can be obtained from the Office of the Director of the PhD Program.

The Chair will guide proposal style and development. The dissertation must be reviewed, approved, and signed by all members of the dissertation committee and the signature page must be included in the final copies of the dissertation.

The American Psychological Association (APA) format is the format used in the Division of Nursing. The Dissertation shall have 6 chapters: introduction, review of the literature, research design, data collection and analysis plan, analysis results and findings, and limitations, conclusions and recommendations as well as a bibliography of references and copies of all instruments unless otherwise directed by the Chair of the Committee. During the completion of the final draft of the dissertation, the candidate should assure that the most current guidelines from the Division of Nursing are being used for formatting and printing the dissertation. Guidelines for dissertation format will be available for the student and final approval of format must be given for the final copies.

**Closing Activities of the Candidate:**

- Changes required as a result of the oral defense should be completed promptly and appropriate signatures secured on the Final Dissertation Approval Form.

- Secure all signatures for the final approved dissertation on the *Dissertation Approval Form.*

- Finalize submission and bound copy orders through ProQuest.
• Distribute Dissertation w/original signature sheet) by due date for graduation to:

• Candidate distributes hard cover bound copies to Director of PhD Program Office (1), and Molloy College Archive. Choice of hard or soft cover copies can be made to Dissertation Chair (1) and Members of the Committee (1 copy each).

Closing Activities of the Chair:

• Notifies registrar to convert N801 grades of WIP to P (Pass) for dissertation.

• Reviews and signs the Dissertation Approval Form.

• Submission of information to the PhD Office for final submission to the Office of Graduate Academic Affairs to obtain the final signature of receipt by the last day of the semester.
Molloy College
Division of Nursing
Dissertation and Graduation Completion Checklist

NOTE: The Dissertation must be defended and submitted to the Office of Graduate Academic Affairs by the last day of the semester for graduation in that semester.

AFTER SUCCESSFUL COMPLETION OF PHD COMPREHENSIVE EXAMINATION:

☐ Enroll in NUR____ and then NUR____ Dissertation Advisement.

☐ Prepare dissertation proposal.

☐ Select committee members: if member is from outside of Molloy College, submit a copy of the person’s CV to the Associate Dean for approval and appointment.

☐ File Proposal Defense form and one page abstract.

☐ Submit Dissertation Proposal (to Associate Dean at least 10 business days before defense hearing date along with written notification of time and place of defense. Student is responsible for booking room.
